The impressive acceleration comes from the twin electric motors. An efficient 2.4L petrol engine helps to charge the battery as you drive, or provide additional torque when required. The vehicle chooses the best drive mode automatically, letting you enjoy the journey and the exceptional fuel economy as low as 2.1L per 100km. At that rate, a full tank of fuel could easily last a month and let you sail past the petrol stations.

We understand that choosing the right vehicle is a significant decision, and we want to ensure that you make an informed choice. Our team is here to provide you with all the necessary information about each option, including their features, specifications, and benefits.
