The most advanced performance side-by-side engine is now better than ever.

Here's what happens when our engineers and racers need a bigger envelope: The 72 in. wide Maverick X3 X rc Turbo RR takes its race-winning TTX suspension geometry to the line with high-performance shocks, wheels, and tires matched for complete control. If you're craving a blast across wide-open terrain and routinely put stability to the test, this is the setup for you.

For next-level traction to conquer the roughest terrain, Can-Am-exclusive Smart-Lok* technology is the new benchmark. A true full lockable on-the-fly front differential with electronically-controlled automatic modes, or with the simple press of a button that offers preset, intelligent calibrations for your type of riding.

The Maverick X3 features an ultralight, rigid chassis made of state-of-the-art Dual-Phase 980 steel- Figure 53% better torsional stiffness and still 20% lighter than its closest competitor.

The all-new 7.6-in wide digital display is lighted and readable in all conditions, with vehicle information and controls. This also means a new keypad to ease mode selecting. All in the comfort of your Ergo-Lok cockpit with four-way adjustable seats and retractable safety harness.
